HOW BNBDAPP MATRIX WORKS

HOW BNBDAPP MATRIX WORKS

BNBDAPP uses a 4x4 two-level matrix system with a total of 20 members in each matrix category.

- **Level 1 (4 Members):** Each member contributes 40%, totaling 160% earnings for this level
- **Level 2 (16 Members):** Each member contributes 30%, totaling 640% earnings for this level
- **Rebuy Mechanism :** The last 3 members automatically rebuy the matrix, ensuring unlimited cycles. Each recycle triggers a 20% level income distribution across 10 levels, sustaining engagement and rewards

In BNBDAPP, after each recycle, you always follow your original upline. However, if your upline lacks a higher package, you surpass them until they upgrade, making higher packages key to maximizing earnings.
